Some Notable Projects Are

- **Centene Broker Management :** Centene Provides facility for the broker to receive commission on the policy sold to the customer, they have a process to onboard the customer through the internal portal and an experience cloud portal dedicated for the brokers. Brokers have multiple features like creation of delegated users, View Policy / Commission, view reports etc.
- **Missouri childcare subsidy implementation** : Missouri Provides childcare facilities to eligible parents and subsidies to childcare providers. There are two Portals one for Parents and one for Providers. The parent applies for childcare through the parent portal. The Providers use the Provider Portal for their internal application, subsidies and children management.

- **Wisconsin Utilities assistance management system** : Wisconsin provides a financial assistance program for its people for general needs. People below the poverty line are eligible for the program. Solutions consisted of public and private portals for the general public and providers.
- **Allegheny County Health Department vaccine management** : Allegheny facilitates flu shots and COVID-19 vaccine to the people via public portals. The solution consists of two portals one for the public and one for the provider. Through the public portal general public can apply for vaccinations and through the provider portal the vaccine administration is managed.

Achievement & Recognition

- Reduced CI/CD pipeline times to 80% using delta deployment practices.
- Wrote blogs for CI/CD Pipelines, Replay debugger etc.
- Developed Unmanaged packages for Profile and Permission set export functionality.
- Worked on healthcare and assistance projects with user in millions.
- Specialist Codeforces, 4 Start at Codechef.
